EDUCATION

California State University-Dominguez Hills

Bachelor of Science in Computer Science

Aug. 2020 – May 2024

Carson, CA

EXPERIENCE

Code Coach

theCodersSchool

Nov. 2023 – Sept. 2024

Redondo Beach, CA

- As a Code Coach, I worked with children from the age of 6-17, in 1:1 or 2:1 group sessions, introducing programming concepts through Scratch and Python, which enabled them to create projects that interest them such as game development and mobile applications

PROJECTS

DineScore - iOS Mobile Application | *Swift, Xcode, Firebase Auth, Firestore*

May 2025 – Present

GitHub

- Designing an iOS app where users rate food and service separately, promoting more transparent and focused dining feedback.
- Implemented onboarding slideshow, email/password authentication, password reset, and user onboarding logic using @AppStorage.
- Built responsive UI in SwiftUI, integrated FirebaseAuth for secure login/logout, and used Firestore to store user data.

FitFlowPro | *Java, Spring Boot, Spring Security, Thymeleaf, PostgreSQL, Git*

Jan. 2024 – Nov. 2024

GitHub

- Developed a full-stack fitness web application, enhancing user engagement and personalized workout recommendations by utilizing HTML, CSS, and JS for the front end with Thymeleaf for templating, and Java Spring Boot and PostgreSQL for the backend.
- Implemented personal account creation and enabled users to rate workout routines by difficulty, improving the algorithm's ability to suggest workouts based on individual preferences.
- Integrated Spring Security to enable email verification and password reset features, enhancing account security and user trust.
- Implemented meal logging feature, with calorie tracker which suggests to users what their caloric goal is to meet their desired weight goal.

Service Shop Database Group Project | *Java, SQL, JDBC, Java Swing*

Nov. 2023 – Dec. 2023

Presentation | GitHub

- Collaborated with classmates to show sample data and apply constraints and default values, ensuring data integrity and consistency.
- Developed over 10 queries to demonstrate that our database could provide required information based on business rules, showcasing complex query creation skills.
- Integrated JDBC into the project and utilized Java Swing to create user-friendly forms, enhancing the project's functionality and user interaction.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, HTML/CSS, Swift

Developer Tools: Git, Postman, Visual Studio, Xcode, IntelliJ, Eclipse, MySQL, PostgreSQL, Linux, Firebase

ACTIVITIES AND ORGANIZATIONS

Computing Alliance of Hispanic-Serving Institutions

California State University-Dominguez Hills

Sep. 2023 - May 2024

Carson, CA

- Attended many workshops, conferences, and talks with Professors, and worked on programming problems as a group.
